

Usability Testing Application Software Code

Here is the link for our application software code: <https://github.com/rpaigemei/cen4721-project>

Instructions to install and run software:

1. Clone git repository into local machine

```
git clone https://github.com/rpaigemei/cen4721-project.git
```

2. Change directory into the project folder

```
cd cen4721-project
```

3. Install dependencies

```
npm install
```

4. Run application

```
npm start
```

5. Change branch to see different design variations

```
git checkout design-b
```

or

```
git checkout design-a
```

Additionally, here are the links to our deployed applications:

Design A: <https://cen4721-project-design-a.netlify.app/>

Design B: <https://cen4721-project-design-b.netlify.app/>
